

275/PL 500F

FIXED BOLLARDS WITH COUNTERFRAME

The fixed 275/PL 500F PILOMAT have been designed and built with architectural appearance similar to that of the retractable PILOMAT bollards and therefore also allows the combined use of both versions.

Current models are the result of our 40 years' experience in the security field and in excess of 20 years in the specific design and manufacture of bollards.

GENERAL FEATURES

The fixed PILOMAT bollards are used in public or private areas in order to define or prevent the parking of vehicles, for preventing access to vehicles in pedestrian areas. These items, with a counterframe to wall, in addition to the architectural appearance of the automatic PILOMAT, allow the removal of the bollard in the event of such a removal being needed, or if impact has occurred.
