

# 127/PF 500F

## FIXED BOLLARDS WITH BRACKETS TO BE ANCHORED IN GROUND

The fixed 127/PF 500F PILOMAT have been designed and built with architectural appearance similar to that of the retractable PILOMAT bollards and therefore also allows the combined use of both versions. Current models are the result of our 40 years' experience in the security field and in excess of 20 years in the specific design and manufacture of bollards.

### GENERAL FEATURES

The fixed PILOMAT are used in public or private areas in order to define or prevent the parking of vehicles, for preventing access to vehicles in pedestrian areas. These items can be cemented to the ground (in this case, the breakout resistance depends on the depth to which it is anchored into the ground) or be secured in place by chemical anchors in places where you cannot make the same anchor, or where masonry is already completed.
