Removable bollards with closed base

Access only when needed

The **RM Series** removable bollards offer a **safe and versatile** solution for access control in **areas with infrequent transit**.

Unlike other systems, the cylinder can be **easily removed without tools**, thanks to the **ergonomic handle** and reduced weight.

Additionally, the **base plate** fully seals the opening, **ensuring safety for pedestrians and vehicles**.

- Removable cylinder with a **quick and intuitive system**
- Fast installation with **only 300mm excavation**
- **No need for electrical power**
- **Safe: handle unlocking protected** by European-standard lock (DIN 18252).

Smart!

Sloped road? The bollard follows the **inclination** for perfect integration.

Standard configuration

The standard configuration of our systems is designed to ensure efficiency, safety and ease of management. The configuration includes:

- **Anthracite grey painted steel bollard**, a device for controlling vehicle access
- **Closed base**, an underground structure housing the cylinder.
