# **B3020 60**

## **ENERGY TOWERS**

The semiautomatic ENERGY B3020 60 towers are designed to provide complementary services such as electricity and telephone communications, compressed air and water. They are used in those places typically used for parking or pedestrian areas, and sometimes used as market areas and places for events, concerts and similar. The use of ENERGY B3020 60 prevents the laying of cables and tubes, guaranteeing greater security for its users.

Current models are the result of the dedication of more than 40 years in the field of access control, and a twenty-year specialization in bollards.

#### **GENERAL FEATURES**

The B3020 60 ENERGY towers with manual movement allow the installation of electrical sockets, single and/or three phase 16A, in compliance with regulations EN 60301-1 and EN 60301-2 and related circuit breakers. The cover plate placed at the top of the tower is in compliance with regulation UNI EN 124 with load class C250.
